Technical Skills

Languages: Java, Python, JavaScript, SQL, C++, C

Core CS: Data Structures, Algorithms, Object-Oriented Programming, Design Patterns, Problem Solving, Complexity Analysis

Systems: Distributed Systems, System Design, Large-Scale Systems, Backend Engineering, Microservices, RESTful APIs, API Design

Cloud/Infrastructure: AWS, EC2, S3, RDS, Lambda, DynamoDB, Docker, Kubernetes, EKS, Terraform, Linux, CI/CD

Data/ML Concepts: Customer Segmentation, Recommendation Systems Concepts, Engagement Automation, Machine Learning Concepts, Data-Driven Systems

Engineering Practices: Design Documents, Design Reviews, Code Reviews, Testing, Debugging, Observability, Monitoring, Root Cause Analysis, Operational Excellence

Work Experience

Software Engineer | Codelark LLC – Client: Ford Motor Company

Aug 2024 – Present

Dallas, Texas, United States – Remote

- Owned production backend features from requirements analysis and technical design through implementation, testing, deployment, validation, and post-launch support using Java, Spring Boot, RESTful APIs, SQL, and AWS.
- Improved backend performance by **30%** by optimizing API execution paths, SQL queries, service-layer logic, data access patterns, and high-volume enterprise workflows.
- Delivered scalable cloud-native services using AWS, Docker, Kubernetes/EKS, Terraform, GitHub Actions, Jenkins, and CI/CD automation to support reliable software delivery.
- Participated in and led design reviews with engineers, architects, product stakeholders, and cross-functional teams to disambiguate requirements and evaluate technical tradeoffs.
- Improved operational excellence by debugging production issues, analyzing logs and service behavior, performing root-cause analysis, and implementing well-tested fixes.
- Contributed to technical documentation, troubleshooting guides, code reviews, testing improvements, and mentoring to raise code quality and maintainability.

Software Developer

Sep 2021 – Jul 2022

Add On Systems Information Technology Services

Bangalore, Karnataka, India

- Built and maintained backend banking applications using Java, Spring, Hibernate, RESTful APIs, SQL, data structures, and object-oriented design principles.
- Reduced query response time by **15%** by optimizing REST APIs, database schemas, SQL queries, and backend workflows with execution times under **50 ms**.
- Debugged defects, reviewed code changes, improved service-layer logic, and supported reliable financial workflows with sub-**100 ms** response times.

Education

University of Colorado Denver

Denver, Colorado, United States

Master of Science in Computer Science; CGPA: 3.65/4.00

Aug 2022 – May 2024

Vasavi College of Engineering

Hyderabad, Telangana, India

Bachelor of Engineering in Electronics and Communication Engineering; CGPA: 3.50/4.00

Jul 2017 – Aug 2021

Projects

Cloud-Native Java Application | Java, Spring Boot, AWS EKS, Docker, Kubernetes

Jan 2025 – Jun 2025

- Deployed a Java/Spring Boot application using Docker, Kubernetes, AWS EKS, Terraform, and CI/CD automation, improving deployment consistency by **40%**.

DDoS Attack Detection | Python, Algorithms, Machine Learning, Data Processing

Jan 2023 – May 2023

- Implemented Python models using Random Forest, K-Means, ANN, and CNN-LSTM to classify network traffic and reduce simulated DDoS impact by **30%**.

Banking REST API System | Java, Spring Boot, Hibernate, MySQL, JWT, Swagger

Jun 2023 – Nov 2023

- Built secure backend APIs using Java, Spring Boot, Hibernate, MySQL, JWT, validation, API documentation, optimized SQL queries, and layered architecture.

Certifications

- AWS Certified Solutions Architect – Associate**, Jun 2024 – Expires 2027
- AWS Certified Developer – Associate**, May 2024 – Expires 2027
- Microsoft Certified Azure Fundamentals**, Apr 2024
