Technical Skills

Languages: Java, Python, JavaScript, C, C++, SQL

AI & Machine Learning: TensorFlow, Keras, Scikit-learn, ANN, CNN-LSTM, Random Forest, K-Means, NumPy, Pandas, Matplotlib, Data Preprocessing, Model Evaluation

Backend: Spring Boot, Spring Framework, Spring Security, Hibernate, JPA, RESTful APIs, SOAP Web Services, Microservices, Kafka, JSP, Servlets

Frontend: React.js, HTML, CSS

Databases: MySQL, PostgreSQL, Microsoft SQL Server, DynamoDB, MongoDB, NoSQL, JDBC, ORM, SQL Query Optimization

Cloud & DevOps: AWS, EC2, S3, RDS, Lambda, DynamoDB, IAM, CloudFormation, Docker, Kubernetes, EKS, Terraform, Infrastructure as Code

CI/CD, Testing & Monitoring: Git, GitHub Actions, GitHub Copilot, Jenkins, SonarQube, Maven, Gradle, JUnit, Mockito, Postman, Linux, Prometheus, Grafana

Methodologies: Agile, Scrum, SDLC, OOAD, Design Patterns, Multithreading, Automated Testing, Code Reviews, Debugging, Root Cause Analysis

Work Experience

Software Engineer | Codelark LLC – Client: Ford Motor Company

Aug 2024 – Present

Dallas, Texas, United States – Remote

- Designed, developed, tested, and maintained scalable Java/Spring Boot backend services and REST APIs supporting cloud-native architectures, integrations, and production-ready deployments.
- Improved backend performance by **30%** by optimizing REST APIs, SQL queries, database interactions, service-layer logic, and scalable microservices workflows.
- Reduced release cycle time by **40%** by implementing automated CI/CD pipelines using GitHub Actions, Docker, and SonarQube quality gates.
- Improved system reliability and backend scalability by supporting containerized Java services on Kubernetes/EKS with AWS, Terraform, CI/CD automation, and production troubleshooting improvements.

Software Developer

Sep 2021 – Jul 2022

Add On Systems Information Technology Services

Bangalore, Karnataka, India

- Developed and maintained high-performance banking applications using Java, Spring, and Hibernate, improving backend reliability and application responsiveness.
- Designed optimized RESTful APIs and database schemas, reducing query response time by **15%** and achieving execution times under **50 ms**.
- Improved backend architecture and application workflows, supporting response times under **100 ms** for key banking system operations.

Projects

Cloud-Native Java Application | Spring Boot, AWS EKS, Docker, Kubernetes | [GitHub](#)

Jan 2025 – Jun 2025

- Deployed a three-tier Java application on AWS EKS using Spring Boot, Docker, Kubernetes, and Terraform, improving deployment consistency by **40%**.

Banking REST API System | Spring Boot, Hibernate, MySQL | [GitHub](#)

Jun 2023 – Nov 2023

- Built RESTful banking APIs and backend integrations using Spring Boot, Hibernate, RESTful Web Services, and MySQL, reducing query response time by 15% through optimized SQL queries and backend logic.

DDoS Attack Detection | Python, ML, Cybersecurity | [GitHub](#)

Jan 2023 – May 2023

- Built ML models using ANN, CNN-LSTM, Random Forest, and K-Means, reducing simulated DDoS attack impact by **30%**.

Education

University of Colorado Denver

Denver, Colorado, USA

MS in Computer Science – **CGPA: 3.65/4.00**

Aug 2022 – May 2024

Vasavi College of Engineering

Hyderabad, Telangana, India

BE in Electronics and Communication Engineering – **CGPA: 3.50/4.00**

Jul 2017 – Aug 2021

Certifications

- AWS Certified Solutions Architect – Associate**, Jun 2024 – Expires 2027
- AWS Certified Developer – Associate**, May 2024 – Expires 2027
- Microsoft Certified Azure Fundamentals**, Apr 2024
